Streaming Music via Bluetooth

1) Make sure the **Vizio Sound Bar** above the TV is **powered on** using the small grey remote. You should see at least one pin size light on the left side.
2) Using the middle top button of the small grey remote, select Bluetooth.
3) Press the **Enter/Play/Pause** button very briefly in the middle of the remote and the lights on the sound bar should start flashing. You will have 15 seconds to pair your device.
4) Sound bar name is **VIZIO SB3630**

No Sound / TV Viewing

1) Verify that the **Sound Bar** above the TV is **turned on**. To turn the sound bar on, press the power button on the small grey remote. The power button is the top left button. A small pin size light should illuminate on the left side of the sound bar.
2) The input should be set to **Optical** on the sound bar. To check this, use the middle top button on the remote and view the small display at the top of the remote.

No Picture On TV

1) Using the Time Warner remote, make sure the **cable box is turned on**.
2) Using the LG TV Remote, verify the TV input is set to **Cable TV**. Input button is the top right button on the LG TV remote.

Connect Windows PC via Wireless Connection

1) Start the **LG Sharing App** on the TV.
2) Press the **Screen Sharing Key** on your PC
3) Select **Connect via Wireless Device**.
4) Select the penthouse TV **[LG] WebOS TV UJ6300**
5) Your screen should then appear on the TV.

Connect PC via HDMI Cable Connection

1) Using the **HDMI Cable**, plug into your **PC HDMI Input Port.**
2) Using the **LG TV Remote**, press the **Input Button** on the top right of the remote until the input labeled **PC** is selected or the TV may come up automatically and just select PC.
3) Your PC may need to have screen sharing turned on. Some windows based PC's have a button at the top, a function key, that has a little computer screen icon on it. If so, press it and select duplicate or other appropriate selection.

Connect Apple Product via Wireless Connection

1) Press the home button in the middle of the TV remote.
2) Select LG TV Plus icon on the right hand side of the TV screen.
3) Follow instructions that appear on the screen.
4) On your Apple device you should be asked to search for a TV. You should be able to select the TV in the penthouse. **[LG] WebOS TV UJ6300**
5) Enter Pin number off of the TV into your Apple device.
6) Follow all the prompts on your Apple device.
7) If the TV goes blank at some point, simply select the home button again on the TV remote. You should then see your device listed on the right side of the screen and select it using the TV remote. If the list of devices disappears before you select your device, simply hit the up arrow button on the TV remote and the list of devices will reappear.
8) You should be asked on the TV to set the password on your phone.
9) If the TV screen goes blank again, please hit the home button one more time and select your device again.
